Name of the activity: Oral Health Education and Screening Program

Date of Activity: 5/8/16

Back ground for the activity: School teachers play an important role in the promotion of oral health among school children. Teachers' oral health, their knowledge and attitudes will tremendously influence the perception of oral health knowledge and practices among children. Therefore, health education program and oral health screening for oral health among teachers could be the first step to inform and motivate them. Therefore, an oral health program for teachers was planned.

Other agency – The program was conducted in collaboration with Aegon Life Insurance.

- Dr. Meehika Gaikwad
- Dr. Priyanka Talmale
- Mr. Manan S
- Mr. Anand S

Activity Guided by:

Faculty/Any other person:

Dr. Ramya R (Reader & Outreach Programs In- Charge)

Participants: School teachers

Brief details of the activity: Health Education and screening of 38 school teachers of Mahatma Gandhi Global Indian Eklavya School, Tilakwada was conducted. Teachers were informed about common oral problems in children and adults. They were explained regarding their roles and responsibilities in school children's oral health.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. The dental public health health team could effectively communicate the need for oral health care to the beneficiaries and had a community dental setting experience.

Suggested actions based on learning from the activity: Based on the positive response, screening of the school children is planned after the term exams in the school.

Name of the activity: Oral Health Education, Screening cum treatment program

Date of Activity: 6/8/16

Back ground for the activity: To address the growing needs of rural population for oral health care and the absence of dentists at primary and community health centres in many areas in around Vadodara district, the Department identified CHC Desar as a centre for providing primary health care in the form of education, screening and basic treatments to the needy people.

Other agency – The program was conducted in collaboration with Community Health Centre, Desar.

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Jalpa Hun (Tutor and Peripheral centre Dentist)
- Mr. Darpanbhai Panchal (Dental Hygienist)

- Mr. Anand

Activity Guided by:

Faculty/Any other person:

Dr. Ramya R (Reader & Outreach Programs In- Charge)

Participants: General Population

Brief details of the activity: Dental Check up and treatment program was conducted. Scaling was performed for 2 patients and restoration of carious lesion was done for 1 patient.

Learning: The treatment program had to be stopped abruptly owing to electric shock sensed by a patient in the mobile van. Electrician was summoned who confirmed the electric shock, following which the treatment program had to be wound up.

Piparia, Tal. Waghodia (391 760)

Suggested actions based on learning from the activity: The problem encountered was informed to appropriate higher authorities verbally and in return. The van has been referred for maintenance work. It was resolved that the mobile dental van would not be taken further until a fitness certificate was obtained. As an alternative solution, the department is in the process of installing a dental clinic at the CHC Desatr itself and permission for the same has been obtained from CDHO, Vadodara and the Medical Suptdt. Of CHC, Desar.

Participants: School children

Brief details of the activity: Health Education and screening of 305 school children from School children of Bhulka Bhavan Vidyalyaya, Waghodiawere conducted. They were informed about common oral problems. They were screened for susceptibility to pit and fissure caries through history and clinical examination. Based on the caries risk assessment, the children who were at high risk for caries were referred to the Department of Public Health Dentistry for application of pit and fissure sealants.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. The dental public health team could effectively communicate the need for oral health care to the beneficiaries.

Suggested actions based on learning from the activity: With the consent of parents and in the presence of school teachers, the screened candidates received pit and fissure sealants at the Department of Public Health Dentistry. The program should be continued and expanded to include other schools.

- Miss. Pooja Meghani
- Miss. Riya Patel

Activity Guided by:

Faculty/Any other person:

Dr. Sweta Singh (Reader, In Charge HoD)

Participants: 187 General Population, school children, Institutionalized elderly

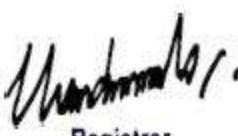

Brief details of the activity: Health Education and screening programs were conducted in **Bharuch region** at PHC, Haldar Village, Zilla Bal Sanstha Mandal School, Vadilo nu ghar (Old age home).

T-shirts with Oral Health Education quotes were distributed among the school children.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. Interns could effectively communicate the need for oral health care to the beneficiaries and had a community dental setting experience.

Suggested actions based on learning from the activity: Engaging budding dentists for oral health promotion will not only benefit the community but also improve the quality of dental professionals to realize social and citizenship roles in the community.

Subject: Request for conducting Tobacco Guthkha Awareness Program in Our Factory

Respected Sir,

I, Mr. Raju Lalchandani, wish to organize a Tobacco & Guthka Awareness program on my factory Maktel Control & Systems Pvt. Ltd., Plot No.1421, GIDC, Waghodia to send your team under leadership to my site. The expected people to attend this program would be around 70. Kindly motivate our workers to quit the habit of tobacco and betel nut chewing.

Thanking You

Yours Sincerely,

Raju Lalchandani

The translated document is attested by Vice Chancellor, SVDU

Name of the activity: Oral Health Education and Screening Program

Date of Activity: 19/8/16- 20/8/16

Back ground for the activity: Rural population bears the brunt of the burden of oral diseases. The Department of Public Health Dentistry as part of institutional social responsibility strives to provide oral health care services by increasing access to knowledge on oral health and diseases.

Institutional social responsibility is also instilled among the interns to arouse their community consciousness as they will be the future dentists.

Other agency –NA-

Activity carried out by:

Faculty/Students

-Miss. Ami Shah

-Mr. Anand Shah

-Miss. Kanan shah

-Mr. Manan Shah

Activity Guided by:

Faculty/Any other person:

Dr. Sweta Singh (Reader, In Charge HoD)

Participants: 221 General Population, school children, Institutionalized elderly

Brief details of the activity: Health Education and screening programs were conducted in **Vadodara region** at PHC, Waghodia, RanukumariPrathmikShala, Padra and Swarg Community Care, Subhanpura.

T-shirts with Oral Health Education quotes were distributed among the school children.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. Interns could effectively communicate the need for oral health care to the beneficiaries and had a community dental setting experience.

Subject: Request for conducting dental camp regarding awareness for consumption of TOBACCO & GUTKHA.

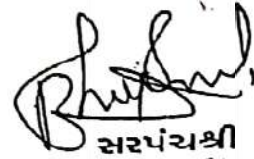

Respected sir,

I, Mr. Bhupadbhai patel working as sarpanch at Vyara, wish to conduct an awareness camp in village, regarding consumption of tobacco & gutkha. I request you to give your expert advice for the same and would like you to send a team of your department at the village on 30th august, 2016, so as to conduct a Dental Camp. I kindly request for your support and consideration for the same.

Thanking you

Yours Sincerely,

Mr. Bhupadbhai patel

ISR REPORT

Name of the activity: "Sankalp Dental Camp Programme"

Date of Activity: 30th August, 2016

Back ground for the activity: A total of 7 dental health awareness & screening camps were conducted in the month of August, 2016

Other agency - None

Activity carried out by:

Faculty: Dr. Bhavna

Post-Graduate Students: Dr. Princy, Dr. Kritika, Dr. Shradha of department of pedodontics & preventive dentistry.

Activity Guided by:

Dr. Bhavna Dave, Head of Department, Department of Paedodontics & Preventive Dentistry.

Participants: 65 Government school children

Brief details of the activity: under 7 dental health awareness and screening camps, basic oral health care education was imparted to school children and oral health screening with consent was carried out. Free dental care was provided to those who required dental treatment at the end of programme, hand sanitization was taught to school children.

Learning: Proper brushing technique for children, dental home care, hand sanitization

Suggested actions based on learning from the activity: Dental health awareness and Hand Sanitization.

Dist. Vadodara-391 760. (Gujarat)

Name of the activity: Oral Health Education Program

Date of Activity: 1/9/16

Back ground for the activity: A structured school oral health program begins with oral health education. Awareness among children and realization of responsibilities by teachers go a long way in improving self- efficacy in maintenance of oral health. Therefore a oral health education program for school children and teachers of Choranda Primary school was planned and conducted

Other agency –The program was conducted in collaboration with NGO partner- Cosmos Foundation

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Sweta Singh (Reader & In- Charge HoD)
- Dr. Ramya R (Reader & Outreach Programs In- Charge)
- Dr. Abhishek Ghosh- PG
- Miss. HetalMendapara
- Miss Pooja Meghani
- Miss. DhvaniDevdhara
- Miss. Rutusha Patel
- Miss. Hiralkher
- Miss. VishakhaVanjaria
- Miss. DivyaGoyani
- Miss. Riya Patel
- Mr. Nirav Prajapati
- Mr. Hiren Godhani

Activity Guided by:

Faculty/Any other person:

Dr. Ramya R (Reader & Outreach Programs In- Charge)

Participants: School children and school teachers of Choranda Primary School

Brief details of the activity: Dental health education to children was provided through cartoon video movies with oral health theme/ subject.

A power point presentation on "Importance of Milk teeth" and "Common oral problems in children" were presented by interns to school teachers.

Attested CTC

Vill. Piparia, Taluka: Waghodia.

Dist. Vadodra-391 760. (Gujarat)

The Faculty and PGs counseled teachers on their role as important stake holder in oral health promotion of school children.

School teachers were given the video CD (oral health education material) with an instruction to play atleast once a week for the students.

Before oral health education, knowledge and practice w.r.t oral health was assessed among the children using a pictorial questionnaire

Learning:Primary children learn by play. Therefore, the cartoon videos with health education message were success and huge hit. The cartoon videos were prepared by students/ interns themselves. This harnessed their potential in development of health education material using technically and creatively innovative methods. It is also believed that reinforcement is important for changing undesirable oral health behaviors.

Suggested actions based on learning from the activity:NGO partners were engaged in the reinforcement of the program. A screening program has been planned subsequently. Impact of oral health education will be assessed in December 2016.

Name of the activity: Oral hygiene screening camp, Oral hygiene instructions, Primary health care education

Date of Activity: 13/09/2016 to 15/09/16

Back ground for the activity: Rural population bears the brunt of the burden of oral diseases. The Department of Public Health Dentistry as part of institutional social responsibility strives to provide oral health care services by increasing access to knowledge on oral health and diseases.

Institutional social responsibility is also instilled among the interns to arouse their community consciousness as they will be the future dentists.

Other agency –none

Activity carried out by: Shriya Shah (Roll no. 54)

Vama Shah (Roll no. 55)

TejasSehrawat (Roll no. 56)

Activity Guided by: Dr. Sweta Singh, Interns In- Charge & Reader, I/c HoD, Dept. of Public Health Dentistry

Participants: 1. Patients visiting the community health centre

2. School children from grade 1 to grade 10

3. Blind trainers

Total: 167 Participants

Brief details of the activity:

1. In primary health centre, the patient's oral hygiene status was checked along with scaling. These patients were then given information on public health education.

2. Oral screening for school children of grade 3 and 4 was conducted. For grade 1 to grade 10, a play was conducted based on the importance of tooth-brushing. Later, they were given oral hygiene instructions.

3. Oral screening for the blind trainers was conducted alongwith horal hygiene instructions as well as public health education was given.

Learning: It made us realize that people are not very aware of the basic oral hygiene practices and it is extremely important to give basic dental education to them.

Suggested actions based on learning from the activity: More awareness programmes as well as screening camps must be conducted to reach out the masses.

Name of the activity: Screening program, Parent Education

Date of Activity: 25th September 2016

Back ground for the activity: To address the growing needs of rural population for oral health care and the absence of dentists at primary and community health centers in many areas in around Vadodara district, the Department identified Rawal as a center for providing primary health care in the form of education and screening to the needy people.

Other agency – The program was conducted in collaboration with Lions Club Foundation.

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Priyanka Talmale (1st Year Post Graduate Student)
- Dr. Hetal Mendapara (Intern)
- Dr. Rutusha Patel (Intern)

Activity Guided by:

Faculty/Any other person:

Dr. Sweta Singh (In- Charge Head of the Department)

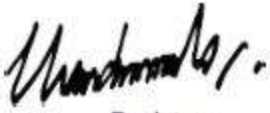

Participants: General Population

Brief details of the activity: Dental Check-up and Parent education program was conducted. A total of 17 patients were screened and checked for underlying oral diseases and patients requiring immediate treatment were short listed.

Learning: A variety of oral diseases were diagnosed and oral lesions owing to tobacco were found more prevalent in the area. Parent education was also given to the community and an urge for better treatment and availability of treatment was put forward for their children.

Suggested actions based on learning from the activity: A treatment camp can be organized in the area. Moreover, the area needs tobacco cessation programs as an immediate action.

Vill. Piparia, Taluka: Waghodia.

Dist. Vadodara-391 760. (Gujarat)

Participants:

1. Aged and /or needy completely edentulous patients residing at Bhadarva village Savli Taluka in Vadodara District.
2. Faculty and Post graduates from the Department

Brief details of the activity:

This Prosthodontic treatment camp targeted minimum 30(Thirty) aged and /or needy completely edentulous patients residing at Bhadarva village Savli Taluka in Vadodara District.

Village for the Prosthodontic camp had been identified in consultation with local social workers and local governing body at Bhadarva village. People were informed about the venue and date for screening through pamphlets distributed by local social workers and or local governing body. **37 completely edentulous patients** were enrolled for the camp.

Treatment camp was for full TWO days (28-09-2016 and 01-10-2016).

On day 1, all clinical and laboratory steps for making primary impressions, master impressions, Jaw relations and wax trial was performed on site. All dentures were processed in the department of Prosthodontics, K M Shah Dental College and Hospital.

All dentures were inserted on Day 2, Date 01-10-2016 on the occasion of The International Day for Older persons and post insertion instructions were given.

There was lecture for creating Prosthodontics' awareness by Dr. Piyush during the camp.

Learning:

1. To learn characteristics that are different from individual practices in the field.
2. To recognize the group responsibility/ team work
3. Collaborating with local governing bodies/ social workers.

Suggested actions based on learning from the activity:

1. Time Factor- the treatment camp was conducted successfully. However there was time constraint for Denture processings. Based on this observation we propose to have 1 week time between day 1 and day 2 visits for future denture camps.

DEPT. OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS

Name of the activity: "ORTHODONTIST DAY "celebration in the department

Date of Activity: 5th October 2016

Background for the activity: Creating awareness and motivating patients regarding the benefits of treatment

Activity carried out by: Dr. Samarth Chellani, Dr. Arti Kriplani, Dr. Hemang Thakkar, Dr. Rushvi Mistry

Beneficiaries: 40 OPD Patients and their accompanies

Activity Guided by: The faculty members of the department of orthodontics

Brief detail of the activity: An awareness programme explaining orthodontics treatment and the benefits of taking this treatment to improve the quality of life in terms of aesthetics and function. A special emphasis is given to effects of orofacial habits and its prevention.

Learning: The participants suggested that if this programme were held in schools then the treatment could be received at an appropriate age thus preventing a major disfigurement of face.

Suggested actions based on learning from the activity: to reach out to schools for educating and screening regarding the orthodontic treatment.

Dist. Vadodara-391 760. (Gujarat)

Activity No.	Details of activity
1	81 factory workers were screened out of which 30 had harmful oral habits. 5 were identified to have oral Potentially Malignant disorders.

Learning:

- The students learnt that the habit related to tobacco and areca nut, are prevalent in patients irrespective of their economic status.
- The students learnt about their social responsibilities as dental professionals and broadly as citizens.
- After thorough counseling the students were able to convince the patients to quit the harmful oral habits.
- The students were able to convince the patients with oral Potentially Malignant Disorders for treatment at KMSDCH.

Suggested actions based on learning from the activity:

- In spite of counseling the patients who were unable to quit the habit were referred to the department of Oral Medicine and Radiology for series of counseling sessions.
- Patients who had Potentially Malignant Disorders were advised for biopsy so as to confirm the staging and ruling out the risk of oral malignancy.
- All the patients irrespective of type of lesion were advised for long term follow up.
- The same patients were also trained to motivate their fellow colleagues/relatives/neighbors for dissociation from tobacco and areca nut related habits.

Faculty/Any other person: Dr. Sweta Singh (Reader, In Charge HoD)

Participants: General Population, orphans, visually challenged and Institutionalized elderly

Brief details of the activity: Health Education and screening programs were conducted at Jeswada PHC (Dahod), Old age home (Dahod), Orphanage (Dahod) and Blind Welfare School (Dahod).

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. Interns could effectively communicate the need for oral health care to the beneficiaries and had a community dental setting experience.

Suggested actions based on learning from the activity: Engaging budding dentists for oral health promotion will not only benefit the community but also improve the quality of dental professionals to realize social and citizenship roles in the community.

Name of the activity: Oral Health Education and Screening Program

Date of Activity: 24/10/16

Back ground for the activity: To address the growing needs of rural population for oral health care and the absence of dentists at primary and community health centers in many areas in around Vadodara district, the Department of Public Health Dentistry identified Bahadarpur, Gujarat as a center for providing primary health care in the form of education and screening to the school students.

Other agency –

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Jalpa Hun (Faculty)
- Dr. Meehika Gaikwad (PG)
- Miss Riya (Interns)
- Miss Hani (Interns)
- Miss Disha (Interns)
- Miss Rutwa (Interns)
- Mr. Navin (Interns)
- Mr. Samir (Interns)
- Darpan Bhai (Dental Hygienist)

Activity Guided by:

Faculty/Any other person:

Dr. Jalpa Hun.

Participants: School Students of Bahadarpur

Brief details of the activity: Screening of 150 school students of Bahadarpur was conducted. They were informed about common oral problems. They were screened for all oral health related problems. Cases of oral lesions and potentially malignant lesions were dominantly present and fluorosis was also observed in the majority of the patients.

Learning:The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. The dental public health team could effectively communicate the need for oral health care to the beneficiaries.

Suggested actions based on learning from the activity:After screening of students, a pick up would be organized in the near future and patients' oral health related problems be taken care of. The program should be continued and expanded to other such rural areas where there is a lack of dentists at primary and community health centers.

Name of the activity: National Tooth brushing Day

Date of Activity: 7th Nov 2016

Back ground for the activity: The Indian Association of Public Health Dentistry declared 7th Nov as National Tooth brushing Day. Also, Colgate encourages oral health care providers to observe oral health month by distribution of tooth brushes and pastes to patients. The Department of Public Health Dentistry observed National tooth-brushing day in the month of November.

Other agency – The program was conducted with the support of Indian Association of Public Health Dentistry and Colgate.

Activity carried out by: Faculty/Students/ Post-Graduates

- Dr. Hemal Patel (Faculty)
- Dr. Pulkit Kalyan (Faculty)
- Dr. Jalpa Hun (Faculty)
- Miss Rutusha Patel, Interns
- Miss Vama Shah, Intern
- Miss Shriya Shah, Intern
- Mr. Tejash Sherawat, Intern
- Miss, Hetal Mandapara, Intern

Activity Guided by:

Faculty/Any other person: Dr. Ajith Krishnan CG (Dean, KMSDC&H& Program Guide),

Dr. Hemal Patel (Senior Lecturer, Dept. of Public Health Dentistry,

KMSDC&H&Program Coordinator)

Participants: 63 Patients who attended the OPD of KMSDC&H

Brief details of the activity: Tooth brushes and toothpastes were distributed (free of cost) by the In- Charge Dean, Dr. Rajesh Sethuraman. Brushing technique and oral hygiene instructions were given to patients at the Oral Health Museum, Dept. of Public Health Dentistry.

Learning: Importance of tooth-brushing was emphasized through this program. Interns were engaged in giving brushing technique instructions and demonstrations to patients. Interns learned to recommend or prescribe suitably according to the need of the patients. Interns realized that oral health education is not a one size fits all approach as they got to interact with several patients one after the other, with totally different needs and expectations.

Suggested actions based on learning from the activity: All patients attending KMSDC&H are motivated through referral system to attend the department museum for receiving brushing technique demonstrations.

Name of the activity: Flag week

Date of Activity: 19th Nov 2016- 25th Nov 2016

Back ground for the activity: As per the directives of the communication received from the National Foundation for Communal Harmony, and with the support of Dean, KMSDC&H, Flag week was observed during 19th Nov 2016- 25th Nov 2016. The National Foundation For Communal Harmony (NFCH) was set up as an autonomous organization under the Ministry of Home Affairs. The main objective of the Foundation was promoting communal harmony, national integration and effective rehabilitation of child victims of communal or terrorist violence. Therefore, the Dept. of Public Health Dentistry, KMSDC&H supported the cause and decided to conduct various activities during the Flag week.

Other agency – The program was conducted with the support of National Foundation for Communal Harmony (which provided stickers/ flags and posters for display during the flag week& stickers for donation box); the Students Council, KMSDC&H

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Ramya R (Faculty)
- Dr. Hemal Patel (Faculty)
- Dr. Pulkit Kalyan (Faculty)
- Miss. Aashka Agarwal (Intern & President, Students Council, KMSDC&H)
- Mr. Faisal Sheikh (PG student(Dept. of Public Health Dentistry)and Member, Students Council, KMSDC&H)
- Miss. Meehika Gaekwad (PG student(Dept. of Public Health Dentistry)and Member, Students Council, KMSDC&H)

Activity Guided by:

Faculty/Any other person:

Dr. Ajith Krishnan CG (Dean, KMSDC&H& Program Guide)

Dr. Ramya R (Reader, Dept. of Public Health Dentistry, KMSDC&H&Program Coordinator)

Participants: 55 Students and Faculty of KMSDC&H

Brief details of the activity: Flag week was observed and stickers/ Communal Harmony flags were distributed. Donations were raised for the said cause. Posters were displayed on the College notice boards. A painting competition was held among the students and interns on the theme of "Communal Harmony". The best paintings were displayed on the notice boards. The paintings and the donations are sent to National Foundation for Communal Harmony.

Learning: National consciousness and Communal Harmony are important for a safe and healthy learning environment. Students and faculty need to promote the feeling of national integration by supporting this noble cause. This activity opened the eyes of many as to how social responsibility could be assumed by taking a small step forward.

Suggested actions based on learning from the activity: A short survey of students' attitudes on role of communal harmony and social responsibility in their professional life has been planned.

WORLD AIDS DAY 2016**Date:** 1st December 2016**Venue:**

1. Anandi Village, Dabhoi

Significance or need of the program:

Anandi village, Dabhoi was chosen as a rally point as a part of activities conducted on World AIDS Day. AIDS related education is important for the teachers, students and the general population. Hence, the target group for rally and health education was the teachers, students and the local population. It is also important that people, especially in areas inaccessible to Primary Health Centers, be educated regarding the same.

Beneficiaries of the program

Total 137 beneficiaries of the Anandi Village attended program.

Participants:

Post-Graduates: Dr. Neha Joshi, Dr Faisal Sheikh.

Interns posted in Department of Public Health Dentistry:

Gaurav Ganjoo, Zeal Gandhi, Pujan Desai, Seema Isani, Aneree Dave, Priya Kansagra, Khushbu Jariwala.

Activities performed

1. The rally was conducted on 1-12-2016, as a part of activities on World AIDS Day.
2. All the teachers, students and the local population were the target of the rally.

Vill. Piparia, Taluka: Waghodia.

Dist. Vadodra-391 760. (Gujarat)

Brief details of the activity:

All the patients reporting to K M Shah Dental College and Hospital were briefed about HIV/AIDS – how it occurs, common modes of transmission, simple ways/precautions for prevention, oral manifestations with early detection and easily accessible point of care.

Learning:

- The students learnt that HIV/AIDS is not uncommon in the patients visiting the dental college.
- Most of the patients were aware about the terminology of HIV/AIDS, and that it spreads due to unsafe sexual practice and were not aware about other modes of transmission.
- The patients were willing to know about other modes of transmission, the preventive measures, and the manifestations for early detection and to know about care center nearest to them.

Suggested actions based on learning from the activity:

- Patients were briefed about other modes of transmission, along with simple methods of prevention.
- Patients were told about the ways to detect HIV/AIDS.
- Patients were made aware about the nearest HIV/AIDS detection and treatment centers.

Name of the activity: Screening program and Oral Health Education

Date of Activity: 9th December 2016

Back ground for the activity: Dabhoi has been one of the target regions of the Department of Public Health Dentistry for its outreach programs. Although Dabhoi has many oral health care providers, there is dearth of specialty care in the area. To improve awareness regarding specialty dental treatment methods and to emphasize preservation of tooth structure, an oral health education program and screening program was conducted in the region.

Other agency – Lions Club, Dabhoi

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Pulkit Kalyan (Faculty)
- Miss. Isha (Intern)
- Miss. Anushree (Intern)
- Miss. Aneree (Intern)

Chintan Patel (Roll no. 08)

Alpa Bhanushali (Roll no. 09)

Activity Guided by: Dr. Sweta Singh, Interns In- Charge & Reader, I/c HoD, Dept. of Public Health Dentistry

Participants: 1. Patients visiting the community health centre
2. School children from grade 1 to grade 12
3. Orphanage home

Total: 187 population

Brief details of the activity:

1. In primary health centre, the patient's oral hygiene status was checked along with oral health education. These patients were then given information on public health education.
2. Oral screening for school children of grade 3 and 4 was conducted. For grade 1 to grade 12, a play was conducted based on the importance of tooth-brushing. Later, they were given oral hygiene instructions.
3. Oral screening for the Orphanage children was conducted along with oral hygiene instructions as well as public health education was given.

Learning: It made us realize that people are not very aware of the basic oral hygiene practices and it is extremely important to give basic dental education to them.

Suggested actions based on learning from the activity: More awareness programmes as well as screening camps must be conducted to reach out the masses.

Name of the activity: Screening program and Oral Health Education

Date of Activity: 11th February 2017

Back ground for the activity: Kalali has been one of the target regions of the Department of Public Health Dentistry for its outreach programs. Although Kalali has many oral health care providers, there is dearth of specialty care in the area. To improve awareness regarding specialty dental treatment methods and to emphasize preservation of tooth structure, an oral health education program and screening program was conducted in the region.

Other agency – Kalali Township, Kalali

- Miss. Kasturi (Intern)
- Miss. Radhika (Intern)
- Mr. Ramchandra (Attendant)

Activity Guided by:

Faculty/Any other person: Ms. Jalpa Hun

Participants: General Population

Brief details of the activity: Dental Check-up and Parent education program was conducted. A total of 75 patients were screened and checked at Kalali, for underlying oral diseases and patients requiring immediate treatment were short listed.

Learning: A variety of oral diseases were diagnosed and oral lesions owing to tobacco and flourosis were found more prevalent in the area.

Suggested actions based on learning from the activity: A referral camp can be organized in the area. Moreover, the area needs tobacco cessation programs as an immediate action.

Name of the activity: Screening Program

Date of Activity: 13/02/17

Back ground for the activity: To address the growing needs of rural population for oral health care and the absence of dentists at primary and community health centers in many areas in around Vadodara district, the Department identified Bhilapur (Vayadpur) Primary School, Gujarat as a center for providing primary health care in the form of education and screening to the school students.

Other agency –

Activity carried out by: Faculty/Students/ Post-Graduates

- Dr. Meehika Gaikwad (PG Student)
- Miss Shivani Shah (3rd Year Student)
- Miss Arohi (Intern)
- Miss Vibhuti (Intern)
- Miss Kasturi (Intern)
- Miss Radhika (Intern)

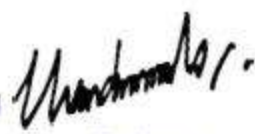

Participants: School Students of Bahadarpur

Brief details of the activity: Screening of 71 school students was conducted. They were informed about common oral problems. They were screened for all oral health related problems. Cases of oral lesions and potentially malignant lesions were dominantly present and fluorosis was also observed in the majority of the patients.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. The dental public health team could effectively communicate the need for oral health care to the beneficiaries.

Suggested actions based on learning from the activity: After screening of students, a pick up would be organized in the near future and patients' oral health related problems be taken care of. The program should be continued and expanded to other such rural areas where there is a lack of dentists at primary and community health centers.

Participants: General population

Brief details of the activity: Dental Check-up and Oral health education was conducted. A total of 40 participants were screened and checked for underlying oral diseases and patients requiring immediate treatment were short listed.

Learning: A variety of oral diseases were diagnosed and oral lesions owing to tobacco and fluorosis were found more prevalent in the area. Oral health education was also given to the population and also an urge for better treatment and availability of treatment was put forward.

Suggested actions based on learning from the activity: A treatment camp can be organized in the area. Moreover, the area needs tobacco cessation programs as an immediate action.

Name of the activity: Oral hygiene screening camp, Oral hygiene instructions, Primary health care education

Date of Activity: 25/02/2017 and 26/02/17

Back ground for the activity: Rural population bears the brunt of the burden of oral diseases. The Department of Public Health Dentistry as part of institutional social responsibility strives to provide oral health care services by increasing access to knowledge on oral health and diseases.

Institutional social responsibility is also instilled among the interns to arouse their community consciousness as they will be the future dentists.

Grishma Bhandari (Roll No 05)

Archie Bhavsar (Roll No 06)

Activity Guided by: Dr. Sweta Singh, Interns In- Charge & Reader, I/c HoD, Dept. of Public Health Dentistry

Target population: 1. Oldage home (screened population:27)

2. School children from grade 1 to grade 8 (screened population:120)

3. Patients visiting Primary Health Centre (screened population:19)

Total: 166 individuals

Brief details of the activity:

1. In primary health centre, the patient's oral hygiene status was checked along with oral health education. These patients were then given information on public health education.

2. Oral screening for school children of grade 1 to grade 8 was conducted. Demonstration of brushing technique was given followed by instructions of tongue cleaning and dietary habits.

3. Oral screening for the oldage was conducted along with oral hygiene instructions as well as denture cleaning instruction was given.

Learning: It made us realize that people are not very aware of the basic oral hygiene practices and it is extremely important to give basic dental education to them.

Suggested actions based on learning from the activity: More awareness programmes as well as screening camps must be conducted to reach out the masses.

ISR REPORT

Name of the activity: Resto-Endo Cognizance 2017

- Student competition (6th March 2017)
 - o Access for success (Access cavity on molar)
 - o Lets create smile (Composite veneer on anterior tooth)
- Resto-Endo awareness campaign (7th March 2017)
 - o 'Dant Suraksha Gyan – A street play

Date of Activity: 6th and 7th March 2017

Back ground for the activity: Cons-Endo week 5th to 7th March 2017 (Through IACDE)

Activity carried out by:

Dr. Nimisha Shah

Dr. Kishan

Dr. Naveen Chhabra

Department of Conservative Dentistry and Endodontics, KMSDCH (Entire staff and post graduates) in association with IACDE

Activity Guided by: Guided by Dr. Nimisha Shah. Coordinated and arranged by Dr. Naveen Chhabra and Dr. Kishan KV.

Participants with number of beneficiaries:

From Community Side: Around 30 patients who came to the college campus on 7th March were made aware about the specialty and importance of root canal treatment.

Brief details of the activity: Street play was organized at the college triangle held on 7th March 2017 to educate patient regarding importance of right treatment by qualified dentists

Activity Guided by:

Faculty/Any other person:

Dr. Sweta Singh (Reader, In Charge HoD)

Participants: Total 183 (Primary School children, elderly people, general population).

Brief details of the activity: Health Education and screening programs were conducted at M.S High school (Halol), primary health centre (Halol), old age home (Halol) with Oral Health Education quotes were distributed among the school children and elderly people of old age home.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. Interns could effectively communicate the need for oral health care to the beneficiaries and had a community dental setting experience.

Suggested actions based on learning from the activity: Engaging budding dentists for oral health promotion will not only benefit the community but also improve the quality of dental professionals to realize social and citizenship roles in the community.

Activity Guided by:

Faculty/Any other person:

Dr. Ramya R (Reader & Outreach Programs In- Charge)

Participants: School Children of Navprerna School, Sama, Vadodara.

Brief details of the activity: Screening of 121 school children from Navprerna was conducted. They were informed about common oral problems. They were screened for common dental problems such as dental caries, mal-aligned teeth, poor oral hygiene, oral cancer. Health education was done through audio- visual aids.

Learning: The program was successful and beneficiaries were made aware of preventive methods, treatments available for various oral health care problems. The teachers were also explained regarding the same. The dental public health team could effectively communicate the need for oral health care to the beneficiaries.

Suggested actions based on learning from the activity: After screening the parents, a pick up would be organized for the future and the children's oral health

Name of the activity: Screening program of general population of Chowkhandi, Vadodara

Date of Activity: 24th April, 2017

Back ground for the activity: To address the growing needs of city population for oral health care and the absence of oral hygiene awareness in many areas in Vadodara district, the Department has conducted a camp at Chowkhandi, vadodara as a center for providing primary health care in the form of education and screening to the needy people.

Other agency –

Activity carried out by:

Faculty/Students/ Post-Graduates

- Dr. Jalpa Hun (Tutor)
- Dr. Priyanka Talmale (1st Year Post Graduate Student)
- Ms. Rushda Malek (Intern)
- Ms. Lakshita Malviya(Intern)
- Ms. Hirva Mehta (Intern)
- Ms. Ashwini Pandit (Intern)

Activity Guided by:

Faculty/Any other person:

Dr. Jalpa Hun

Participants: General population

Brief details of the activity: Dental Check-up and Oral health education was conducted. A total of 27 participants were screened and checked for underlying oral diseases and patients requiring immediate treatment were short listed.

Learning: A variety of oral diseases were diagnosed like Early childhood caries, severe periodontitis were found more prevalent in the area. Oral health education was also given to the population and also an urge for better treatment and availability of treatment was put forward

Suggested actions based on learning from the activity: A treatment camp can be organized in the area. Moreover, the area needs tobacco cessation programs as an immediate action.

ISHA GANDHI(Roll No-13)
ZEAL GANDHI(Roll No-14)

Activity Guided by: Dr. Sweta Singh, Interns In- Charge & Reader, I/c HoD, Dept. of Public Health Dentistry

Place:Nadiad

Target population: 1. Old age home (screened population:10)
2. Orphanage (screened population:20)
3. Patients visiting Primary Health Centre(screened population:12)

Total: 42 individuals

Brief details of the activity:

1. In primary health centre, the patient's oral hygiene status was checked along with oral health education. These patients were then given information on public health education.
2. Oral screening for orphanage was conducted. Demonstration of brushing technique was given followed by instructions of tongue cleaning and dietary habits.
3. Oral screening for the oldage was conducted along with oral hygiene instructions as well as denture cleaning instruction was given.

Learning: It made us realize that people are not very aware of the basic oral hygiene practices and it is extremely important to give basic dental education to them.

Suggested actions based on learning from the activity: More awareness programmes as well as screening camps must be conducted to reach out the masses.

Faculty/Any other person:

Dr. Sweta Singh, Dr. Ramya R Iyer, Dr. Hemal Patel, Dr. Pulkit Kalyan

Participants: 37 Villagers of Kothav village, Vadodara district, Gujarat

Brief details of the activity: A short play was conducted by the Interns of the Department stressing on the adverse effects of tobacco usage, and on the importance of self- realization of these effects. There- after, health education was imparted to the villagers and door to door leaflets were distributed which enlightened the villagers about the harmful habits of consuming tobacco and counselled them upon quitting the habit. T-shirts and caps donning anti-tobacco slogans were also distributed to the villagers. Also, posters were put up around the village eliciting the harmful habits of tobacco and promoting cessation of tobacco in order to provide better quality of life.

Vill. Piparia, Taluka: Waghodia.

Dist. Vadodara-391 760. (Gujarat)

Learning: The play presented by the interns was very well accepted by the villagers. A few villagers also came forward for counselling and vowed to quit the habit. Over all, the entire effort was very well appreciated by all and a step closer was taken to make the village a tobacco free village.

Suggested actions based on learning from the activity: A full screening camp can be organized and later a referral. A proper follow up can be done for those who want to quit habit post counseling.

Name of the activity:“RashtriyaVayoshriYojana” Denture camp

Date of Activity:23 July 2017

Back ground for the activity:“RashtriyaVayoshriYojana”is a Scheme for providing Physical Aids and Assisted-living Devices for Senior citizens belonging to BPL category’ by Ministry of Social Justice & Empowerment, Government of India.Physical Aids and Assisted-living Devices for Senior citizens are distributed in Camp mode and the Schemeis implemented through the sole implementing agency, ‘Artificial Limbs Manufacturing Corporation (ALIMCO)’, (a PSU under M/o SJ&E), which undertakes one year free maintenance of the aids & assisted living devices. The devices will help the Senior Citizens to overcome their age related physical impairment and to lead a dignified and productive life with minimal dependence on care givers or other members of the family. The ambitious Scheme, first of its kind in the country is expected to benefit 5, 20,000 Senior Citizens over a period of the 3 years.

This is a Central Sector Scheme, fully funded by the Central Government. The expenditure for implementation of the scheme will be met from the "Senior Citizens' Welfare Fund". Under the Scheme, the following Aids and Assisted-Living Devices is provided to eligible elderly beneficiary senior citizens, depending upon their physical impairment :-

1. Walking sticks
2. Elbow crutches
3. Walkers / Crutches
4. Tripods / Quadpods
5. Hearing Aids
6. Wheelchair
7. Artificial Dentures
8. Spectacles

In this context a treatment camp was conducted on above mentioned dates for completely edentulous patients by the Department of Prosthodontics and Crown & Bridge. KMSDCH, SV.

Other agency – District Health Department and ALIMCO

Activity carried out by:

Faculty

1. Dr Rajesh Sethuraman
2. Dr. Tamanna Chhabra
3. Dr. Kavita Gupta
4. Dr. Paranjay Prajapati

Students: Post graduates: DrRutvik, DrJatin, Dr Krishna, DrBindal, DrShikha, DrVenu
Interns: Priya Thakkar, Anjali Tilwani, Darshan Vaghasiya, Alisha Vora

Activity Guided by:

Faculty: Dr Rajesh Sethuraman

Participants: 43 Senior citizens belonging to BPL category

Brief details of the activity: Districts selected for implementation of the 'Scheme of Providing Physical Aids and Assisted-Living Devices to Senior Citizens in BPL category' during 2016-17 in Gujarat were Vadodara and Ahmedabad. In Vadodara district Savli and Desai are two places which had been selected for camps on 23,24,25,26 and 29 July 2017. Camps were conducted at primary health centres of respective place. Materials for said camp was provided by KMSDCH and on said dates primary impressions were made on site. And impressions were brought to KMSDCH. Subsequent steps for making dentures were conducted at Dept. of Prosthodontics, KMSDCH, SV.

Learning: The program was successful and beneficiaries were provided with dentures so that their disability of chewing food is corrected. This improves their quality of life in longer run.

Students' learned the onsite treatment rendering.

Faculty: Dr Rajesh Sethuraman

Participants: 43Senior citizens belonging to BPL category

Brief details of the activity:Districts selected for implementation of the 'Scheme of Providing Physical Aids and Assisted-Living Devices to Senior Citizens in BPL category' during 2016-17 in Gujarat were Vadodara and Ahmedabad. In Vadodara district Savli and Desar are two places which had been selected for camps on 23,24,25,26 and 29 July 2017. Camps were conducted at primary health centres of respective place. Materials for said camp was provided by KMSDCH and on said dates primary impressions were made on site. And impressions were brought to KMSDCH. Subsequent steps for making dentures were conducted at Dept. of Prosthodontics, KMSDCH, SV.

Learning:The program was successful and beneficiaries were provided with dentures so that their disability of chewing food is corrected. This improves their quality of life in longer run.

Students' learned the onsite treatment rendering.

Name of the activity:“RashtriyaVayoshriYojana” Denture camp

Date of Activity: 29 July 2017

Back ground for the activity:“RashtriyaVayoshriYojana”is a Scheme for providing Physical Aids and Assisted-living Devices for Senior citizens belonging to BPL category’ by Ministry of Social Justice & Empowerment, Government of India.Physical Aids and Assisted-living Devices for Senior citizens are distributed in Camp mode and the Schemeis implemented through the sole implementing agency, ‘Artificial Limbs Manufacturing Corporation (ALIMCO)’, (a PSU under M/o SJ&E), which undertakes one year free maintenance of the aids & assisted living devices. The devices will help the Senior Citizens to overcome their age related physical impairment and to lead a dignified and productive life with minimal dependence on care givers or other members of the family. The ambitious Scheme, first of its kind in the country is expected to benefit 5, 20,000 Senior Citizens over a period of the 3 years.

This is a Central Sector Scheme, fully funded by the Central Government. The expenditure for implementation of the scheme will be met from the "Senior Citizens' Welfare Fund". Under the Scheme, the following Aids and Assisted-Living Devices is provided to eligible elderly beneficiary senior citizens, depending upon their physical impairment :-

1. Walking sticks
2. Elbow crutches
3. Walkers / Crutches
4. Tripods / Quadpods
5. Hearing Aids
6. Wheelchair
7. Artificial Dentures
8. Spectacles

CONSTITUENT INSTITUTE OF SUMANDEEP VIDYAPEETH
AN INSTITUTION DEEMED TO BE UNIVERSITY

Brief details of the activity:

- Gave health education & awareness on road traffic accidents with the help of IEC material(Poster)
- During the talk following points were explained :
 1. To follow and obey traffic rules
 2. Follow traffic signal
 3. Only cross the road through zebra crossing
 4. Maintain the speed limit of one's vehicle
 5. Compulsory wear helmet while driving two wheelers

Learning:

- Communication skill of Interns was developed
- Interns also got the knowledge regarding traffic rules

Suggested actions based on learning from the activity:

- More people of the community to be involved like parents of the school teachers can be called when the awareness/health education activity is to be done
- Awareness/health education can also be given with the help of power point presentation

ISR Activity Report

Name of the activity: Awareness talk given on “Beti Bachao Beti Padhao” at Government school in Malu Village of Sankheda Taluka District Chotaudepur.

Date of Activity: 08/02/17

Back ground for the activity:

- The sex ratio has been generally adverse in India i.e. the number of women per 1000 men has generally been less than 1000.
- Sex ratio at birth still reduces which is affected by sex selectivity at birth
- So awareness talk was given on the topic “Beti Bachao Beti Padhao”.

Participants: 2 students 1 Teacher

Activity carried out by:

- Interns who were posted at RHTC, Bahadarpur Department of Community Medicine SBKS MI RC Sumandeep Vidyapeeth Piparia

Activity Guided by:

- Dr Bhavesh Bariya (Assistant Professor)
- Sonaliben Jadav (MSW) and Kuldeep Bhrambhatt (MSW)

Activity carried out for:

- Women (elderly and middle aged), children (6 to 10 years), anganwadi workers
- Post natal mother
- School students from 1st to 5th standard

Brief details of the activity:

- Gave awareness talkon "Beti Bachao Beti Padhao" with the help of IEC material(Chart)
- During the talk following points were explained :
 1. Boy and girl should be treated as equal
 2. Girl child has same right as boy child and ser should be encouraged for studying more and more
 3. It was also informed that sex determination at birth is punishable by law
 4. All the audience were also made aware about Sukanya Samridhi Yojana (Girl Child Prosperity Scheme) where separate account in the name of girl is made and money can be deposited in that account which can be used for the benefit of the girl child.
 5. This has been introduced by our Honorable Prime Minister Shri Narendrabhai Modi on January 2015.

Learning:

- Communication skill of Internswas developed
- Interns also got knowledge regarding the yojna given by Govt. of India for girl child

Suggested actions based on learning from the activity:

- Activity can be done by natak or role play
- House to house awareness can be given in the village for the empowerment of girl child

ISR Activity Report

Name of the activity: Awareness talk given on "Immunization" at Anganwadi of Lotia Village of Sankheda Taluka District Chotaudepur.

Date of Activity: 22/02/17

Back ground for the activity:

- The diseases like polio myelitis, tuberculosis, hepatitis B, diphtheria, pertusis, tetanus, humaninfluenza B, measles cause significant amount of morbidity and mortality especially in children below 5 years of age.
- Tetanus may cause complications during the delivery if not immunized during the antenatal period.
- These all mentioned diseases are vaccine preventable diseases which can be prevented by administration of vaccines.
- So awareness talk was given on immunization

Activity carried out by:

- Interns who were posted at RHTC, Bahadarpur Department of Community Medicine SBKS MI RC Sumandeep Vidyapeeth Piparia

Participants: 2 students, 1 teacher

Activity Guided by:

- Dr Maharshi Patel (Assistant Professor)
- Sonaliben Jadav (MSW) and Kuldeep Bhrambhath (MSW)

Activity carried out for:

- Antenatal and Post natal mothers
- Anganwadi workers

REPORT OF BMD CAMP 2016-2017

The Department of Orthopaedics had successfully organized and conducted Bone Mineral Density (BMD) camp at Dhiraj Hospital, SVU, Piparia, Vadodara on 26/11/2016 (Wednesday) from 9 am onwards till 5 pm.

In BMD camp all the needy patients were first examined in OPD and those above 50 years of age and few suspected cases were referred for BMD evaluation. In total around 135 numbers of patients participated in this BMD camp and out of which 38 number of patients were diagnosed with low BMD i.e. Osteoporosis and 51 numbers of patients were identified with borderline BMD.

After evaluation, necessary advices regarding dietary intake and supplementations were given to the patients with low BMD as well as borderline patients. This helped in screening of patients with low BMD and educating them in OPDs regarding consequences of low BMD as well as its cure by respective consultants.

AN INSTITUTION DEEMED TO BE UNIVERSITY

Brief details of the activity:

Awareness Campaign through local media was done before the date of camp to inform the beneficiaries about the camp date, time and type of services available.

Before the actual day of camp the site visit to see the facilities and for arrangements for camp.

On the camp day the separate counter is made for information, registration and separate OPD are created for each specialty.

According to the need of the patient each beneficiary is being guided.

Once the check-up is complete the beneficiary comes to the final counter where he is being provided with medicines for minor illness or else guided by the staff at the counter to visit the base hospital for further treatment.

Brief details of the activity:

Awareness Campaign through local media was done before the date of camp to inform the beneficiaries about the camp date, time and type of services available.

Before the actual day of camp the site visit to see the facilities and for arrangements for camp.

On the camp day the separate counter is made for information, registration and separate OPD are created for each specialty.

According to the need of the patient each beneficiary is being guided.

Once the check-up is complete the beneficiary comes to the final counter where he is being provided with medicines for minor illness or else guided by the staff at the counter to visit the base hospital for further treatment.

Awareness Campaign through local media was done before the date of camp to inform the beneficiaries about the camp date, time and type of services available.

Before the actual day of camp the site visit to see the facilities and for arrangements for camp.

On the camp day the separate counter is made for information, registration and separate OPD are created for each specialty.

According to the need of the patient each beneficiary is being guided.

Once the check-up is complete the beneficiary comes to the final counter where he is being provided with medicines for minor illness or else guided by the staff at the counter to visit the base hospital for further treatment.

Dist. Vadodara-391 760. (Gujarat)

Smt. B. K. Shah Medical Institute & Research Centre

CONSTITUENT INSTITUTE OF SUMANDEEP VIDYAPEETH
AN INSTITUTION DEEMED TO BE UNIVERSITY

Brief details of the activity:

Awareness Campaign through local media was done before the date of camp to inform the beneficiaries about the camp date, time and type of services available.

Before the actual day of camp the site visit to see the facilities and for arrangements for camp.

On the camp day the separate counter is made for information, registration and separate OPD are created for each specialty.

According to the need of the patient each beneficiary is being guided.

Once the check-up is complete the beneficiary comes to the final counter where he is being provided with medicines for minor illness or else guided by the staff at the counter to visit the base hospital for further treatment.

NAME AND TYPE OF THE ACTIVITY: Observing world AIDS day

DATE OF THE ACTIVITY:

1st December 2016

VENUE: Dabhoi CHC

BACKGROUND OF THE ACTIVITY:

World AIDS day takes place on 1st December each year. It's an opportunity for people worldwide to unite in the fight against HIV to show support for people living with HIV. Founded in 1988, world AIDS day was the first ever global health day. It is an opportunity to show solidarity with the millions of people living with HIV worldwide. Most people do this by wearing a red ribbon on the day. It is to raise awareness, educate and improve the understanding of HIV as a global public health program. Hence students of SNC have observed world AIDS day to bring awareness on AIDS and its prevention.

ACTIVITY CARRIED OUT BY:

The activity was carried out by the students of 4th year B.Sc, 2nd year MSC Total:

58 Students

ACTIVITY GUIDED BY:

NAME AND TYPE OF THE ACTIVITY:

Organising health day on "World Heart Day"

DATE OF THE ACTIVITY:

29th september 2019

BACKGROUND OF THE ACTIVITY:

The significance criteria for celebrating "World Heart Day" is to promote the preventive measures to reduce the risk of cardiovascular diseases. The theme was "Power Your Life"

Sep 29 marks world heart day, a global initiative to raise awareness of CVD.

This is to inform people that CVD, including heart disease and stroke, is leading cause of death. The theme of this year "World Heart Day" - is based on the thought that small changes - following a healthy diet; increasing physical activity; and abstaining from smoking; can make a difference on heart health and avoid premature death.

ACTIVITY CARRIED OUT BY :

This activity was carried out by the 3rd year BSC nursing students, 3rd year GNM students, 2nd year MSC students, 2nd year BSC students. (Total-170 students)

ACTIVITY GUIDED BY :

The activity was guided by

1. Mr. Ravindra H N, Principal, SNC
2. Ms. Gagan, Asst. Professor, SNC
3. Mr. Kevin, Asst. Professor, SNC

PARTICIPANTS : Patients and relatives of Dhiraj hospital- (56 beneficiaries)

BRIEF DETAILS OF THE ACTIVITY:

There was poster competition, poster exhibition, and video presentation.

- POSTER COMPETITION FOR BSC AND GNM NURSING STUDENTS:

Poster competition was arranged for the students; students participated in the poster competition and made posters related to prevention of CAD. Certificates and prizes were given to the students who made efforts to win the competition.

- **QUOTES / SAYING ON WORLD HEART DAY :**

Nursing students participated in the programme by making quotes and sayings on the "World Heart Day "theme 2016 . The best quotes and sayings were displayed on the notice board . Prices and certificates were distributed to the students who did well.

- **PUBLIC AWARENESS / POSTER EXHIBITION PROGRAMME :**

A public awareness programme was organised by the MSN department at OPD in Dhiraj General Hospital .

2nd year PG students displayed the posters and educated the general public about the prevention of coronary artery diseases .

Video presentation was also made to educate them for prevention of CAD .

- **POSTER EXHIBITION :**

Posters were being exhibited at SNC to impart knowledge to UG students .

LEARNING :

At first the students were not aware of the importance of keeping their heart healthy , but after the awareness program and video presentations , posters and excellent speeches they realised the importance of heart health .

SUGGESTED ACTIONS BASED ON LEARNING FROM THE ACTIVITY

Need of more student involvement and . Increase the interest of participators and there should be proper time management.

❖ **REST AND SLEEP:**

People who sleep five hours or less a night may be at higher risk of developing high blood pressure or worsening already high blood pressure. There's also an increased risk of high blood pressure for people who sleep between five and six hours a night. It's thought that sleep helps your blood regulate stress hormones and helps your nervous system remain healthy. Sleeping seven to eight hours a night may play a role in the treatment and prevention of high blood pressure.

about the health
effect of the junk
food.

satisfied their appetite with junk food
are less likely to eat healthy foods
like fruit, vegetables or dairy products.

- Studies reveal that as early as the age
of 30, arteries could begin clogging and
lay the groundwork for future heart
attacks

**1. It can cause memory and learning
problems.**

A study published in the American
Journal of Clinical Nutrition in 2011
showed that healthy people who ate junk
food for only 5 days performed poorly on
cognitive tests that measured attention,
speed, and mood. It concluded that eating
junk food for just five days regularly can
deteriorate your memory. This probably
stems from the fact that a poor or toxic diet
can cause certain chemical reactions that
lead to inflammation in the hippocampus
area of the brain which is associated with
memory and special recognition.

2. Increases the risk of dementia
This has been one of the scariest discoveries
associated with the consumption of junk food.
You may know that insulin is produced in the
pancreas and helps in the transportation of
glucose to fuel the body. Insulin is also
produced in the brain where it helps in
carrying signals between nerve cells and
forming memories.

Dist. Vadodara-391 760. (Gujarat)

			<p>Brown University shows that too much fatty food and sweets can substantially increase the insulin levels in our body.</p>			
		To discuss about the health effect.	<ul style="list-style-type: none"> 3. Lessens its ability to control appetite Excess consumption of trans fats found in fried and processed foods can send mixed signals to the brain which makes it difficult to process what you have eaten and how hungry are. This is probably why you end up overeating. Healthy brain functions require a daily dose of essential fatty acids like omega-6 and omega-3. Deficiency of these two elements increases the risk of attention deficit disorder, dementia and bipolar disorder and other brain-related problems. 4. It can cause chemical changes that can lead to depression A lot of studies have shown that eating foods high in sugar and fat actually changes the chemical activity of the brain making it more dependent on such foods. A study conducted at the University of Montreal on mice showed that they suffered with withdrawal symptoms after their regular junk food diet was discontinued. In humans, these 	Lecture cum discussion		What is the effect of body by eating junk food?

withdrawal symptoms can lead to the inability to deal with stress, make you feel depressed and eventually you would turn back to those foods to comfort yourself and handle these feelings.

- 5. It makes you impatient and can cause uncontrollable cravings Eating a sugary cupcake or doughnut may temporarily spike your blood sugar levels making you feel happy and satisfied but as soon as they return to normal you are left feeling all the more irritable.

To discuss about anti food measures.

Anti-junk food measures :

A number of countries have adopted, or are considering, various forms of legislated action to curb junk food consumption. In 2014, United Nations Special Rapport on the right to health, Anand Grover, released his report, "Unhealthy foods, non-communicable diseases and the right to health," and called for governments to "take measures, such as developing food and nutrition guidelines for healthy diets, regulating marketing and advertising of junk food, adopting consumer-friendly labelling of food products, and establishing accountability mechanisms for violations of the right to health."

Dist. Vadodara-391 760. (Gujarat)

An early, high-profile and controversial attempt to identify and curb junk food in the American diet was launched by the so-called McGovern Committee, formally, the United States Senate Select Committee on Nutrition and Human Needs, between 1968 and 1977, chaired by Senator George McGovern.

Initially formed to investigate malnutrition and hunger in the US, the committee's scope progressively expanded to include environmental conditions that affected eating habits, like urban decay then focused on the diet and nutritional habits of the American public.

It criticized the use of salt, sugar and fat in processed foods, noted problems with overeating and the high percentage of ads for junk food on TV, and stated that bad eating habits could be as deadly as smoking.

The findings were heavily criticized and rebutted from many directions, including the food industry, the American Medical Association, and within the committee itself.

In 1977, the committee issued public guidelines under the title, Dietary Goals for the United States, which became the predecessor to Dietary Guidelines for Americans, published every five years beginning in 1980 by the US Department of Health and Human Services.

SR. NO	TIME	SPECIFIC OBJECTIVE	CONTENT	TEACHING LEARNING ACTIVITY	AV AIDS	EVALUATION
1.	05 min	To explain about complications of diabetes mellitus.	<p>THE COMPLICATIONS OF DIABETES MELLITUS</p> <p>Introduction:</p> <p>There are 2 type of diabetes mellitus type 1 & type 2. In both type the amount of sugar in the blood is elevated. People with either type 1 or Type 2 diabetes likely to have list of complications as a result of the elevated glucose level. However because type 2 diabetes are likely to have present for some time before it is diagnosed, complications in type 2 diabetes may be more serious or more advanced when they are discovered.</p> <p>Wider health problems accelerate the deleterious effects of diabetes. These include smoking, elevated cholesterol levels, obesity, high blood pressure, and lack of regular exercise.</p>	Explanation	Video	What is diabetes complication?

Attested CTC

will eventually lead to dehydration. The body's cells become progressively dehydrated as water is taken from them and excreted. Electrolyte imbalances are also common and are always dangerous. As with DKA, urgent medical treatment is necessary, commonly beginning with fluid volume replacement. Lethargy may ultimately progress to a coma, though this is more common in type 2 diabetes than type 1.

Hypoglycemia

Hypoglycemia, or abnormally low blood glucose, is an acute complication of several diabetes treatments. It is rare otherwise, either in diabetic or non-diabetic patients. The patient may become agitated, sweaty, weak, and have many symptoms of sympathetic activation of the autonomic nervous system resulting in feelings akin to dread and immobilized panic. Consciousness can be altered or even lost in extreme cases, leading to coma, seizures, or even brain damage and death. In patients with diabetes, this may be caused by several factors, such as too much or incorrectly timed insulin, too much or incorrectly timed exercise (exercise decreases insulin requirements) or not enough food (specifically glucose containing carbohydrates). The variety

Attested CTC

Pranav 12/5/2021

plasma glucose concentrations, antecedent hypoglycemia leads to a vicious cycle of recurrent hypoglycemia and further impairment of glucose counterregulation. In many cases (but not all), short-term avoidance of hypoglycemia reverses hypoglycemia unawareness in affected patients, although this is easier in theory than in clinical experience.

In most cases, hypoglycemia is treated with sugary drinks or food. In severe cases, an injection of glucagon (a hormone with effects largely opposite to those of insulin) or an intravenous infusion of dextrose is used for treatment, but usually only if the person is unconscious. In any given incident, glucagon will only work once as it uses stored liver glycogen as a glucose source; in the absence of such stores, glucagon is largely ineffective. In hospitals, intravenous dextrose is often used.

Diabetic coma

Diabetic coma is a medical emergency in which a person with diabetes mellitus is comatose (unconscious) because of one of the acute complications of diabetes:

Attested CTC

Signature 12/5/2021

diabetes are likely to have experienced the problem as much as 10 to 15 years earlier than men without diabetes.

Respiratory infections

The immune response is impaired in individuals with diabetes mellitus. Cellular studies have shown that hyperglycemia both reduces the function of immune cells and increases inflammation. The vascular effects of diabetes also tend to alter lung function, all of which leads to an increase in susceptibility to respiratory infections such as pneumonia and influenza among individuals with diabetes. Several studies also show diabetes associated with a worse disease course and slower recovery from respiratory infections.

Periodontal disease

Diabetes is associated with periodontal disease (gum disease) which may make diabetes more difficult to treat. Gum disease is frequently related to bacterial infection by organisms such as *Porphyromonas gingivalis* and *Actinobacillus actinomycetemcomitans*. A number of trials have found improved blood sugar levels in type 2 diabetics who have undergone

Attested CTC

abnormal and decreased sensation, usually in a 'glove and stocking' distribution starting with the feet but potentially in other nerves, later often fingers and hands. When combined with damaged blood vessels this can lead to *diabetic foot* (see below). Other forms of diabetic neuropathy may present as mononeuritis or autonomic neuropathy. Diabetic amyotrophy is muscle weakness due to neuropathy.

3. **DIABETIC RETINOPATHY :**

growth of friable and poor-quality new blood vessels in the retina as well as macular edema (swelling of the macula), which can lead to severe vision loss or blindness. Retinal damage (from microangiopathy) makes it the most common cause of blindness among non-elderly adults.

4. **DIABETIC ENCEPHALOPATHY**

is the increased cognitive decline and risk of dementia, including (but not limited to) the Alzheimer's type, observed

foot wounds. It is the most common cause of non-traumatic adult amputation, usually of toes and or feet, in the developed world.

Carotid artery stenosis does not occur more often in diabetes, and there appears to be a lower prevalence of abdominal aortic aneurysm. However, diabetes does cause higher morbidity, mortality and operative risks with these conditions.

In the developed world, diabetes is the most significant cause of adult blindness in the non-elderly and the leading cause of non-traumatic amputation in adults, and diabetic nephropathy is the main illness requiring renal dialysis in the United States.

6. RESTRICTIVE LUNG DEFECT

is known to be associated with diabetes. Lung restriction in diabetes could result from chronic low-grade tissue inflammation, micro angiopathy, and/or accumulation of advanced glycation end products. In fact the presence restrictive lung defect in association with diabetes has been shown even in presence of obstructive lung diseases like asthma and COPD in diabetic

Attested CTC

SUMMARY

At the end of the sensitization programme on complication of diabetes the diabetic client are aware about diabetes, its type various complication of diabetes mellitus, types of complication and prevention of diabetes complication.

To,

The Registrar,

SV

Subject: Observing World Physical therapy Day on 8th September 2016

The college of physiotherapy, SV is planning to observe World Physical therapy Day on 8th September 2016 at 10 am at College of Physiotherapy, SV. Based on this year's theme "Add life to years", we have planned a "fitness screening camp" for elderly of Sumandeep Parivaar within college premises. Approx 50 members of Sumandeep Parivaar have consented to attend the camp.

Estimate of the budget is as follows;

1. Flyers and Banners ---	Rs 2000
2. Print & Stationary items. -----	Rs 3000
3. Snacks for elderly participants	Rs 2500

Total budget approx. should not exceed Rs 10,000.

We kindly request approval of some advance, approximately Rs 4000 /- from impressed money so that we can start organizing the program.

We request also following arrangements for the camp:

- Audio system
- Photographer

We request you to kindly approve the above at the earliest

WORLD PHYSIOTHERAPY DAY – 2016
College of Physiotherapy, Sumandeep University
Accredited NAAC 'A' grade with CGPA 3.53 on 4 point scale

Fitness screening was done at 9 stations as given below:

Station 1: Registration and history- here demographic & anthropometric data along with Physical activity readiness questionnaire (PAR – Q) were obtained.

Station 2: General assessment- Vitals, Range of motions, Uni pedal stance time, screening deformity and posture

Station 3: Lower body strength by performing 30 second Chair Stand test

Station 4: Upper body strength by performing Arm Curl test

Station 5: Grip strength assessed Hand held dynamometer

Station 6: Lower body flexibility by Chair Sit-And-Reach test

Station 7: Upper body flexibility by Back Scratch test

Station 8: Dynamic balance by Timed up and go (TUG) test

Station 9: Endurance by 2-Minute Step Test

Image 2: shows all stations

At each station Physiotherapy faculty performed the fitness test. Total 12 faculties participated in the activities. 178 students also participated.

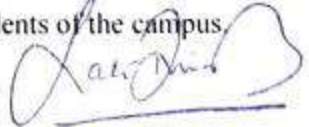

Total 20 elderly of University campus participated. The record of each test was entered in the booklet which each participant received at the registration counter. The detail report on their fitness was also dispatched to the respective participants.

While waiting in the hall, participants were also requested to fill questionnaire regarding their "Mood". Geriatric Depression Scale: short form was used for this. Among 20 participants, total 4 elderly scored >5 but <10 which "suggest" depression and requires comprehensive assessment by professionals. During camp refreshments (tea & biscuits) were also arranged.

Overall Feedback regarding camp from participants was highly *positive* and *encouraging*, recommending 'fitness club' to be started for the elderly residents of the campus.

WORLD PHYSIOTHERAPY DAY – 2016
College of Physiotherapy, Sumandeep University
Accredited NAAC 'A' grade with CGPA 3.53 on 4 point scale

"ADD LIFE TO YEARS"

Report on World Physical therapy Day, 8th September 2016

The College of Physiotherapy, Sumandeep Vidyapeeth organized "fitness screening camp" for elderly residing in the University campus, on the occasion of World Physical therapy Day, 8th of September 2016. This was conducted from 10 am onwards at the College premises, based on this year's theme "Add life to years". Dr G. V. Shah, Dean, Medical College, Dr Kautilya Shukla, Director, Learning Resource Centre, along with HODs of Anatomy, Physiology and Community Medicine joined the camp. Professors of various departments, senior nurses, employees of inventory and maintenance department and few relatives residing in staff quarters also participated in this camp.

REPORT

On

Health Education and Awareness Program on "Safe use of Sanitary Napkins"

The Women Cell, Department of Management, Sumandeep Vidyapeeth organized a Health Education and Awareness Program on "Safe use of Sanitary Napkins" on 8th March 2017. The inaugural ceremony was held at 12:00 noon with Mrs. Utkala Singh as Chief Guest and Dr. Dulari Gandhi, Chairman, Women Welfare and Anti-sexual harassment Committee, SVU. The guests for the event appreciated the social cause initiated by the Women Cell, Department of Management. Mrs. Utkala Singh talked about how she was closely associated with Army Wives Welfare Association and worked towards the welfare of the women. Dr. Dulari Gandhi took note of the event and praised the students and wished them all the best for the event. Dr. Bhairavi Shah, professor, Paediatrics Department. SBKSMIRC congratulated the team for their efforts for the welfare of the women in the society and asked them to continue the same in future. After the words of praise and appreciation from the guests the female members progressed towards the Piparia Village from 2pm onwards. The event was sponsored by Shreeji Hygiene Pvt. Ltd. "Miss n Moms" sanitary pads. The female students and staff (Dr. Medha Wadhwa and Mrs Mital Thakkar) of the department after the approval from the Piparia Village authorities visited the village. The females of the village gathered at the compound area where the members from the department educated the villagers about the menstrual cycle and importance of hygiene especially during those days. The Department of Management members distributed them the samples of the sanitary pads to the females of the villages. The villagers appreciated the efforts of the department and hoped to carry out similar activities in the future.

A Report on
"Community awareness program on Dengue and Chikungunya-2016"

Name of the activity: Community awareness program on Dengue and Chikungunya.

Date of Activity: 25th September, 2016.

Place of Activity: Mastupura village.

Back ground for the activity: Department of Pharmacy, Sumandeep Vidyapeeth conducted a community awareness program on dengue and chikungunya was organized at Mastupura village.

Activity carried out by: 07 faculty member and 200 students are actively participated from department of pharmacy.

Activity Guided by: 07 faculty member are actively Guided from department of pharmacy.

Participants:

From Community Side: Villagers of Mastupura village

Brief details of the activity: Students along with staff members visited Mastupura village. Dr. Girish Sailor and Dr. Kushal Gohel were The Co-ordinators of the program. Dr. Rajesh Maheshwari, Dr. Ankur Javia, Dr. Vikas Chandrakar, Dr. Dhaval Joshi and Ms. Disha Shukla were the staff members among others who accompanied the students.

Community awareness program organized at Mastupura

The camp was conducted from 11 am- 1 pm. In Mastupura village, around 185 patients were examined for their Blood pressure, Body weight, and Body mass index. Medication histories of patients were also taken. Some of the elderly patients were found to have high blood pressure. They were advised some diet modifications and exercises.

They were also advised to start treatment consulting a doctor. Students displayed informative and creative posters and scitoons on Dengue and Chikungunya and explained to the villagers. Posters were made in Gujarati for the better understanding of villagers. Villagers were informed about essential measures and precautions to be taken to prevent Dengue and Chikungunya. Leaflets containing information's on Dengue and Chikungunya were distributed to create awareness.

A Report on
"Community awareness program-2016"

Name of the activity: Community awareness program-2016.

Date of Activity: 24th November, 2016.

Place of Activity: Drug Information Centre near Dhiraj General Hospital.

Back ground for the activity: A community awareness program was organized in front of Drug Information Centre near Dhiraj Hospital.

Activity carried out by: 10 faculty member and 190 students are actively participated from department of pharmacy.

Activity Guided by: 10 faculty member are actively Guided from department of pharmacy.

Participants:

From Hospital and community Side: Patients from Dhiraj Hospital.

Brief details of the activity: Dr. Rajesh Maheshwari, Dr. Kushal Gohel, Mr. Dhaval Joshi & Dr. Nirmal Shah were coordinators of the program. Total of 190 students participated in the program. Blood sugar determination and blood pressure measurements of patients were carried out. Some of the elderly patients were found to have blood sugar level. They were advised some diet modifications and exercises. They were also advised to start treatment consulting a doctor. Students also made informative and very creative posters and scitoons related to disease. Posters were made in Gujarati for the better understanding of patients. They also counseled the patients about the need to control blood sugar and its complications. Drug counseling by checking the patient medication history also was conducted.

Learning: Need of patient counselling about diseases.

Suggested actions based on learning from the activity: Will encouraged students and staff member to participate in a patient counselling about various diseases.
