EVIDENCE BASED EDUCATION SYSTEM

Objectives

To prepare doctor/dentist/medical care provider of first contact, capable of functioning independently in both urban and rural environment with special attention to diagnosis prevention and treatment planning of the diseases/health related problems and prevention of same by being abreast to scientifically proven empirical evidence.

Provide education that allows hands-on-experience both in hospital as well as in community setting with systematic evidence based approach, educational experience that emphasizes health rather than only disease with outcome-based education as a goal.

- Inculcate the technique of reasoning, ability to understand the evidence, the nature and hierarchy of the evidence, critically choose the best evidence and apply it in clinical practice.
- To facilitate a learning experience that will provide the skills to develop, implement and disseminate an evidence-based approach for effective health care practice.
